This is not clickbait.

If you check social media often, you may see posts of users posting "conspiracy theories images or information". And doing it again, and again, and again.

And, what? **Nothing changes.**

It's called psychological warfare. The "in your face operation". Nothing changes, people.

Fat jerks in the basement will not change anything. In fact, I live in a country I see my fellow countrymen letting themselves be killed. They seem to not care they are fat and being enslaved. And you know what? **I am not like them.**

We are not all the same in this world. This is not about nationalities, about races, or any vain concept. This is about who we are in our hearts.

There is an "x-y-axis" in this world, composed of:

Nobility ----- Evil

Intelligence ----- Stupidity

Where do each one fall in? That's the question.

These factors can shift during lifetime, and the thing is, we have to help ourselves.

It's all about efficiency. We belong together us that belong together, and we belong distanced us that we are not to be mingled.

You see, in my country I got poisoned because they fancied putting pesticides in the yerba mate in purpose.

Two years I went autistic when I only should have been in the best moment of my life.

Two years ago I quit PMO (porn, masturbation, orgasm), but I did never have the superpowers in exchange (what a lot of people discuss they experience) (and everyone should if they practice semen retention).

Because I started drinking caffeinated products more than ever to counter the syndrome of abstinence. That's how I got filled with pesticides.

It has never been the problem caffeine. It has been the pesticides. And I know most of them came from the yerba mate. I had to learn the hard way.

How didn't I tell before? Autism, motor problems, zombie dark circles under the eyes.

I thought it was the syndrome of abstinence. That's how I lost two years.

I am passing the message people.

You are getting very distracted when you are normalizing conspiracy theories advancing and not doing

anything about it.

Are you going to let yourselves be killed? What is holding you back?

Are you noble? Evil? Intelligent? Or stupid?

What I am doing is helping you **polarize**.

Stop watching porn. Don't masturbate. Practice semen retention, you men.

Stop eating sunflower oil and PUFA's. There is a synergy operation going on. A lot of people are fat pretty much because of PUFA's alone. Then even a lot of pesticides are lipophilic and they get stored in the fat. If people were to lose fat quickly, for example, because they can't access food, they could die or have manic crisis out of all the oxidative stress and the poisons being flushed into the bloodstream.

And we are to pass solutions, not speak problems.

But don't worry, I am taking the heat.

What I am asking is, please, beyond anything, just take this in your heart.

And then, if you wanted to, you could lend some economical support. It has been pretty tough for me surviving these two years even left in a very uncomfortable situation been left disabled, and I would appreciate some help that I could transform into a sauna room in my house, or anything that could speed up my detoxing process so that I can pass the message as it has to be. I am calling for a cooperative worldwide project, so that the controlled opposition has no room for it.

First place for Jesus. Barabbas comes later, for the losers.

Anyone interested, please send a private message.

Thank you.

What I am doing is helping you **polarize**

This is a key message, well said.

But a better approach is to not think in good (or as you write noble) vs. evil and polarize first between:
1.) positive: seeking to be in service for others in the first place (above yourself), make the world a better place

tasfarelel

Member

Joined: Feb 14, 2022

Messages: 143
Location: US

for everybody
2.) negative: help yourself first, then help others if you can while you are getting stronger

Outside of this polarity, "evil" are people who are not helping others, and in the long run also not themselves - so basically just destroy or hinder others and themselves to develop.

Oh my goodness. I didnt even read that document thoroughly, but @Guille Yacante seems on the level of Hitler, Stalin and Mussolini.

He is really a psychopath as all those revolutionaries and dictators were. Every massacre starts with good intention and ends up in bloodshed.

Its predictable. Every one of them executes his opponents and crowns himself and does same things like those opponents which he executed.

He thinks if he is on the top, maybe hurting will work.

We all live in a society and have our share of responsibility.

There is an **autistic apocalypse** in the horizon, and if we don't do our part and care for them being detoxified and cured, we may be paying the consequences.

Autism is a symptom of chronic poisoning. True "autism" is that. Not being able to make eye contact? Awkward behavior? We are not going to normalize this. So many of us know that vaccines cause this in the young children, and how many do anything about it? Cowards will pay, sooner or later.

Autism is generally caused by a buildup of **organophosphates*** organochlorines in the brain and cells of the person. The blood is poisoned too. The person is constantly detoxing. *edit: at first I thought it was because of organophosphates, but it is due to organochlorines like DDT.

But if one keeps playing the Russian roulette of receiving vax-shots, don't expect a recovery.

People are tagged "autistic" when they are too poisoned, they are absolutely disabled.

If their poisoning is mild, they would be tagged "Asperger's".

We need to stop this immediately. Because, if we don't react as a society now, we may pay through different ways, even becoming autistic.

Remember that I said that it is mainly due to **organophosphate*** organochlorine poison buildup. This can happen without vaccines. I got poisoned and became autistic at 26 years old because of having drank poisoned yerba mate without realizing. This is happening in Argentina right now, has been happening for years. It's a genocide. But this is what the Satanists have planned for any part of the world too. Watch it, because they have been doing this walking in their toes in the so-called first world countries, poisoning the coffee grounds, for example. If we don't react now, then it may be too late, too late for many.

All the solutions are here, in the book I wrote: **Modern Procer Project NOW!**

Please read it. It's free and will always be.

Download it, and print it please.

Everything is there:

- Cure and prevention of autism, chronic illnesses.
- All the information to stop all the system of enslavement that has been created around us.
- Who did cause all these evils.
- Call to action.
- Gospel of the Lord Jesus Christ.

People poisoned with **organophosphates*** organochlorines, with chronic toxicity, can experience an energetic blockage. People cannot cry, cannot behave normally, they would feel awkward, want to be always alone. **And that is not life.**

And people don't seem to care because of SEXUAL IMMORALITY.

Sexual immorality makes those not affected to not care. They are naturally COWARDS.

Then they may end up paying, because an autistic person is very frustrated generally. And if she sees that there is a lot of sexual immorality, even exhibitionism, get ready for a shooting or something. Stop looking the other way. I am telling you. This is what is coming if we people don't react as a society and start caring about each other.

Solution is: **stop getting poisons in, and make use of hemodialysis.**

Hemodialysis cleans the blood. It has always been dissuaded because it has been told that it is only for cases of "renal failure". That has always been a dissuasion tactic. Over with that.

Poisoned people always feel better when they lose some blood, for example, when they donate blood, close to a pint of it (500ml). Why would it be?

But that's not the way. That way a lot of red blood cells are lost, and could potentially lead to an anemia.

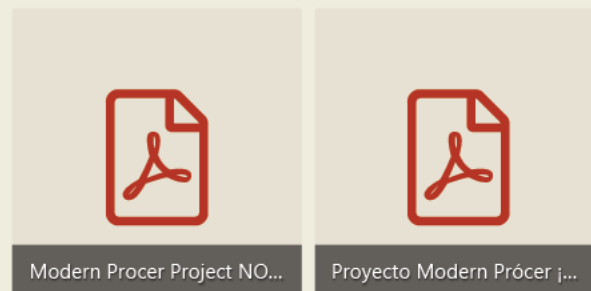

Enough for this post. Read the book for yourselves, and take action.

Available in English and Spanish.

Interesting!! I am seeing autistic like traits in nearly everyone nowadays. Every small child is walking on their toes, lining up their toys instead of playing with them, not making eye contact. I don't think I walked on my toes or lined up my toys but I think my Mom poisoned me with vaccines and drugs as a child. I was constantly on antibiotics she gave me a drug for every sniffle and fed us processed food. I didn't even know what some nutritious foods tasted like.

My question is what do you say about kids who weren't poisoned? I didn't allow any vaccines in me or my child when I got pregnant and he's on the autism spectrum. Now 15 and very hermit like. Genius in other ways though. Have you heard of the lutein connection? It's extremely high in spinach and eggs, I ate green smoothies when I was pregnant with him, lots of raw spinach. People are recovering just by avoiding lutein. [Sara's Diet - The Lutein-Free Solution](#)

@InChristAlone people can be poisoned beyond having been vaccinated or not. That's the thing, we need to react as a society right now and stop thinking about solving puzzles which only seem to get more difficult as time passes.

This systematic poisoning of humanity is being done by psychopaths. My say is, we need to help ourselves using

hemodialysis properly, it may take some sessions, of course, **and attacking the common enemy**. We need to stop the prey mentality, always running!

Semen retention stops that. This is the job of men.

So, I think that, continuing with your answer, elimination diet would be useful for the meantime. But we must never normalize food intolerances, there's always going to be a reason why the person is not reacting well to certain food, be it that the food be poisoned, or that the person has got her enzymes inhibited by something. Again, if we delay self-defense, there are only more problems coming.

And lastly, masturbation and watching pornography lots of times induces behaviors in people, that others may erroneously tag "autistic behavior". Some may not be poisoned at all but with lots of guilt and shame, and they just naturally don't want to have anything to do with socializing or living life. Porn hacks the dopaminergic system, and that, together with ejaculation, or excess of orgasm in the woman, would lead to desensitizing it.

Hey man. I'm currently struggling with problems like this. I grew up very autistic. Just found out I received vaccines the day I was born as a premature baby.

I don't think the people that promote this stuff are human.

Premature babies have no blood brain barrier or a weak one. Soul shattering.

Title of the research: "Endocrine disruptors in dialysis therapies: A literature review".

We must not drown in a glass of water.

And how about we don't use them?

I don't know anything about this therapy (hemodialysis), I mean, I am not a doctor, but I get the idea.

It's all about filtering and cleaning the blood. The work of the kidneys, normally.

But, context. We are living in the 21st century, and we are and have been exposed to a lot of poisons. Our bodies have been adapting to this, and up a certain threshold there is a collapse.

To clean rapidly these poisons, hemodialysis should be done. And it's all about replacing the plasma, little by little, through the sessions that be necessary.

What is plasma made of? Alright, I don't know everything, but isn't it enough the idea I am bringing?

We keep the red blood cells, we clean the plasma. We provide the electrolytes and everything that be needed, and we don't drown in a glass of water.

The plasma replacement, for example, when one loses blood, is, as far as I know, something called "saline solution".

It could be made up from, in a makeshift way, from 1 part of seawater diluted in 3 parts of freshwater.

First of all, I want to express my gratitude to this forum.

This forum takes its name from a man that has made his own research: Raymond Peat.

I don't agree with everything he has said, but I have learned a lot from the researches of this man. And it is to highlight that he didn't keep himself shut, but he did share his knowledge.

That's how so many of us, at least me, have learnt the truth about serotonin and PUFA's, among other things.

And something all his research has inspired, or has led other people to do, is to do the same. To think one for himself, to test the mainstream hypotheses and prove them right or wrong. We all want solutions.

And we are living in dangerous times right now. Things changed drastically in the last decades, and I have to say, the man did fall for the same that I have up until recently. He seems to have overlooked the "poison" subject, while paying too much attention to the neurotransmitter-ligand model, or other things that can never make the difference when there is a poisoning going on.

Then, because of overlooking the most important: keeping things simple, people started to become supplement freaks, and just like people taking pharma drugs, they seem to not have found or searched the reason why they "would have to take them" in the first place.

We are being poisoned people, in different ways.

And we want solutions.

I am presenting my website: [modernprocer.com](#)

It's not a forum nor will ever be, so it's not for competing with this one.

It's a straightforward website, with free E-books for download, and straightforward articles. I want to make the best use of the time of the people.

And I have just published my first article, you are invited to check it out: [What is autism?](#)

It goes beyond autism, so I really invite you to give it a read.

Thank you so much.

Interesting article on autism, are you saying that caffeine contributes to this condition? Please elaborate. Thx

No, absolutely not.

What I am saying is that the poisoning of caffeine sources is a major causant not only of autism, but of many chronic illnesses. Caffeine is not a poison. Organophosphates are.

But caffeine can accelerate the metabolic rate and induce ketosis, so leading to the breakdown of fats for fuel, and this usually causing the symptoms people would call the "jitters". It's not only the PUFAs causing oxidative stress but **mainly** the stored poisons (pesticides) causing their effects when they are flushed into the bloodstream.

I have learnt all these things because of my personal case. If I hadn't suffered this on my own, maybe I would have never been able to tell. I was left autistic because of having been drinking poisoned yerba mate for years without realizing. So I can tell what "autism" is like. And we need to stop this right now. It has been done in purpose.

All the solutions are in that same article, but even more in the free E-book available in the homepage.

Caffeine is not a poison. Organophosphates are.

Coffee is one of the most pesticide sprayed crops. It is stupidity turning a blind eye to what is going on with our crops and buying something like coffee inorganic and thinking it's a deal. As the saying goes, "Pay the butcher or pay the doctor."...

"This study shows the importance of controlling the type and the quantity of pesticides used. Then using the methods validated, calculations of transfer of pesticides from the coffee bean to the body of the consumer must be done. This permits the safe daily consumption based on the consumer's body weight. In addition, proper training and qualifications are needed to handle pesticides. This can be initiated by farmers to reduce the negative impacts on public health and the environment. New strategies can be applied to reduce pesticide residues in coffee, and in turn reduce their impact on human health and the environment. Integrated management is needed. For example, producers must adapt phytosanitary measurements parallel with studying the type of soil. Plant diseases should be controlled with rational use of pesticides that are environmentally safe, less toxic, and avoid the choice of resistance strains. On the other hand, recent studies have called for organic farming or providing natural solutions rather than the use of pesticides."

"Farmers use dozens of pesticides, herbicides, and fungicides in conventional coffee agriculture. Here are some of the most commonly used and found in and on coffee.

1. Glyphosate: a common herbicide used to control unwanted weeds, also known in the U.S. and Roundup®
2. Mancozeb: used to prevent fungal disease in plants
3. Endosulfan: an insecticide used mainly to kill coffee borer beetles
4. Atrazine: an herbicide applied on broadleaf weeds
5. Chlorpyrifos: a standard herbicide used to control insect infestations

What's the problem with pesticides on coffee you ask?

The World Health Organization **classified glyphosate** as a probable carcinogen in 2015. **Other studies** have concluded that this herbicide disrupts endocrine function and can alter the reproductive system."

Guille Yacante said: 

No, absolutely not.

What I am saying is that the poisoning of caffeine sources is a major causant not only of autism, but of many chronic illnesses. Caffeine is not a poison. Organophosphates are.

But caffeine can accelerate the metabolic rate and induce ketosis, so leading to the breakdown of fats for fuel, and this usually causing the symptoms people would call the "jitters". It's not only the PUFAs causing oxidative stress but **mainly** the stored poisons (pesticides) causing their effects when they are flushed into the bloodstream.

I have learnt all this things because of my personal case. If I hadn't suffered this on my own, maybe I would have never been able to tell. I was left autistic because of having been drinking poisoned yerba mate for years without realizing.

So I can tell what "autism" is like. And we need to stop this right now. It has been done in purpose.

All the solutions are in that same article, but even more in the free E-book available in the homepage.

Thanks

Coffee is one of the most pesticide sprayed crops. It is stupidity turning a blind eye to what is going on with our crops and buying something like coffee inorganic and thinking it's a deal. As the saying goes, "Pay the butcher or pay the doctor."...

"This study shows the importance of controlling the type and the quantity of pesticides used. Then using the methods validated, calculations of transfer of pesticides from the coffee bean to the body of the consumer must be done. This permits the safe daily consumption based on the consumer's body weight. In addition, proper training and qualifications are needed to handle pesticides. This can be initiated by farmers to reduce the negative impacts on public health and the environment. New strategies can be applied to reduce pesticide residues in coffee, and in turn reduce their impact on human health and the environment. Integrated management is needed. For example, producers must adapt phytosanitary measurements parallel with studying the type of soil. Plant diseases should be controlled with rational use of pesticides that are environmentally safe, less toxic, and avoid the choice of resistance strains. On the other hand, recent studies have called for organic farming or providing natural solutions rather than the use of pesticides."

"Farmers use dozens of pesticides, herbicides, and fungicides in conventional coffee agriculture. Here are some of the most commonly used and found in and on coffee.

1. Glyphosate: a common herbicide used to control unwanted weeds, also known in the U.S. and Roundup®
2. Mancozeb: used to prevent fungal disease in plants
3. Endosulfan: an insecticide used mainly to kill coffee borer beetles
4. Atrazine: an herbicide applied on broadleaf weeds
5. Chlorpyrifos: a standard herbicide used to control insect infestations

What's the problem with pesticides on coffee you ask?

The World Health Organization **classified glyphosate** as a probable carcinogen in 2015. **Other studies** have concluded that this herbicide disrupts endocrine function and can alter the reproductive system."

Sadly one cannot trust organic stuff any more given that they cheat and continue to relax the organic standards.

This is true especially for organics in Mexico, where they don't get around to inspecting a good majority of their organic companies. America is much stricter, so I sleep well about it.

I want to insist in that we be helping each other. We have been set up in a system of slavery, everything based upon ignorance, and perpetrated by the evil of those knowing.

It's a system of induction to error. To be induced to fall and then be kicked in the floor. That's what the common enemy has worked for.

How do we help ourselves?

Look, few things can be as important as having health, pretty much anything else in the world doesn't compare to it.

If it is lost, then people can get desperate. If they don't know how to get it back (or for the first time in their life for many) learned helplessness may be at the door. Specially when the "doctors" don't know what to do about it, what they were led to, by the way.

If a person loses her health, specially affecting her energy system, tendency is always to get worse. People get affected, then they don't look appealing to the rest. The rest don't care about getting involved because of being sexually immoral mainly. And then the poor person is left adrift to the system of predation.

If she looks ugly, or sick, she may be called "schizophrenic". And be installed in antidopaminergics.

The person was just poisoned, and maybe entangled with some vices. She needed to know that, and be helped. But no, nobody did it.

So the people passing by led her to learned helplessness too.

Then maybe some of the others get affected, and then they look like the crippled, like the zombies.

Who cares? Those still not affected are still banging, or jerking off.

That's what keeps this system! Sexual immorality.

No moral standards = cowardice, fear of death.

Then no one gets involved. Then each one pays at his turn.

Let's stop this right now.

All solutions, or better said, the way for them unrestrained, in my free E-book at modernprocer.com.

And just saying. I think I found the cure of autism and a lot of chronic illnesses.

So please, *move it*. We are getting ourselves out of this together.

Watch it, lest 2024 be turned into "1984".

Print the books.

modernprocer.com

Have you seen Karen Hurd's story? Her family was poisoned by organophosphates. Her daughter almost died like twice being the one who was youngest and crawling around on the carpet where it was sprayed. She was able to heal her family with psyllium husk and nutrients. And she has a bean protocol for eliminating toxic bile.

Why people dont think pesticides and other environmental poisons should be the first thing to look into for their bad health is baffling to me, especially people on this forum...

FURNITURE & MCS (Multiple Chemical Sensitivity)

"In November, 1995, an international conference was held to study the problem of "Environmental endocrine-disrupting chemicals," and to devise strategies for increasing public awareness of the seriousness of the problem. Their "Statement from the work session" says "New evidence is especially...

@InChristAlone that sounds like acute poisoning, in contrast with chronic. I never heard about that story.

But that's how one gets confused, I think it's a pattern. It sounds beautiful to try to get all "natural", but organophosphates are what?

Synthetic.

And they needed technology to be synthesized. To be poisons.

Why are we going to be behaving like if technology was only in the hands of those using it for evil?

No. My stance is to use the technology immediately for fixing things quickly, and safely. With no quack, folk remedies, even "if they were to work."

Took technology to be caused this harm. Takes technology to undo it.

That's my thinking, and I put a name to it:

- Hemodialysis for cleaning the blood.
- Time to let the body readapt in between sessions.
- Activated charcoal for toxin binder in the GI tract as needed.

And **of course**, why speculating if there are poisons here or there? 21st century people! Lab tests, some people get paid for this! If they look the other way, they are to pay. They are not to be fearing mafias, but the people.

And if we be dealing with irreversible acetylcholinesterase inhibitors, we should be thinking about using the so-long discovered since **reactivators**.

I'll tell you something. People get what they think they deserve. People don't ask, don't demand: they don't get anything.

All this harm is being done in purpose, by people that constantly see that they don't defend themselves. So they try to convince others saying: "You see? They deserve it."

And I have been saying it all: the major cause of learned helplessness is not "high serotonin", or "low dopamine", but a low spirit because of feeling guilty for something.

If we disengage ourselves from sexual immorality, from scrolling mindlessly, or from anything that would be bothering our consciences, then we would be unstoppable as human beings. Defending ourselves and our neighbors.

In contrast, the poisoning keeps going on, the zombies keep piling up. Prepare yourselves for an apocalypse.

We don't want that. Choose option one.

I'm of the opinion there are many more toxins than just pesticides. Peat himself suggested OJ concentrate from the store. OJ is not a clean food! Was he trying to poison us? I don't think so, but he didn't realize how toxic the food is now. And organic doesn't cut it anymore. They use copper fungicides.

I agree on the activated charcoal, I think every person in the world needs to be taking that everyday. Peat had me scared off it because the particle size was so small it could clog my capillaries. I have yet to see any evidence people are dying from it. Rather lives are turning around. Body wide eczema completely reversing. If it were clogging capillaries we would see something. And so I was poisoned by toxic mold for years not knowing I could just take activated charcoal. Because he scared me from it. I am now taking it every morning and seeing my eczema get better.

I'm not so sure on hemodialysis though.

I'm not so sure on hemodialysis though.

Hemodialysis should be the "panacea".

It's because of what it consists of: *cleaning the blood*.

Anything cleaning the blood could solve lots of problems, the which are mainly caused by poisons, and not by "lack of this drug, or that one."

YES! LOTS OF PEOPLE WILL HAVE TO REINVENT THEMSELVES!

This is the health and lives of people. If some think that they can look the other way and prey on the weak because the rest is doing so, I would think they are to be removed from the world.

No one is saying that one is to leave something to stay empty handed and starve. One leaves the lie to embrace the truth.

That's what I try to do **in the book**. To show the way for people to care, and to know how to be empowered.

Following with the subject of hemodialysis, I never got one nor I know anyone that did. But it's all about understanding what it is about. And paying attention to a very common and expected pattern: it is ignored. And it is dissuaded.

Something that cleans the blood, that can remove all the toxins from the plasma. That is cheap, convenient, that would solve lots of "incurable" diseases. When people are afraid of the long half-lives of some poisons, but when with the aid of **proper** hemodialysis all of this could be corrected in few days.

A person would go to ask for an hemodialysis and **I imagine**, she would have to deal with a lot of filters of people trying to know why, "which is her renal problem".

Well, I say, I want to call to remembrance the amount of affected children because of the injections. The cases of people poisoned and then tagged as schizophrenics. The people suffering thinking that they are to suffer endlessly their "multiple sclerosis" or "cancer diagnostic". And immediately say that if they care about getting their problems solved, then nothing can stop them now.

Bounds loose!

Empower the men, tell them to stop jerking off, to stop being fornicators. If men were to treat women as they would like another man to treat his daughter or sister, then this world would operate differently.

That's it. Get it moving, because I am needing this myself, and I am not making a move alone. We are to be acting as a society.

Everything said here could be stopping a genocide in diapers in each of your countries. So far, at the cost of Argentina, and my own suffering.

The least I am expecting is that you be sharing the information, the [website link](#).

Each day I am still spitting putrid taste in my mouth. Did you know autistic children have the same? But they never say, **because they never knew what it is to not have poison taste in their mouth**.

And here you are. You already know what is causing this: **organophosphates***. (edit: ***sodium channel disruptors**, mainly organochlorines like DDT)

And you know the solutions. To a lot of problems beyond "autism".

I ask you please, share with doctors, with scientists, with personnel of the armed forces, but with anyone who would be noble, and would care about doing something about this.

Let our nationality be that of being noble, and no imaginary frontiers be diving us.

I am presenting my second article: [Understanding the world](#).

Topics covered:

- Rushing through Genesis to understand Creation and bringing God to remembrance.
- Explaining the phenomenon of the "French Revolution".
- Explaining what happened during the 20th century.
- Bringing us aware of our situation in early 2024.
- And understanding what is about to happen.

Have a good read.

Thank you.

Third article is out: **Things clear.**

Topics covered:

- How to be free from sexual immorality, to avoid relapsing frequently.
- Education about gender roles.
- How to make marriage work.
- Call to action regarding protecting the people from the Great Collapse worldwide.
- Things clear. What we are for, and what we are not for.

Thank you.

Presenting my fourth and last article: **Call to action.**

I don't make content for keeping the people entertained and glued to the screen.

If anything was to be a game changer, truly empowering information, that would produce a change, and convince because of its power.

That's what I expect this to be.

So for now, I don't see any reasons for making more articles or anything.

I leave here my legacy for now.

This article covers:

- Call to empathy, and prevention of people trying to drag down others.
- Remembering the cure of "autism" and a lot of chronic illnesses.
- Call to action so to prevent problems and fix those that are.
- Guidelines for advancing unrestrained.

Please, share, because I plan on doing more things in the future. But that has to be in "another world".

Thank you.

Many people discovered the cure of "autism" before, but it has never been able to get to the people yet. That's because of cowardice, evil, beta male behaviour, and lack of brains.

We are not to go like idiots clapping "we've got the cure". It has been systematic poisoning. The cure is just to clean the blood, the cells, ~~and provide cholinesterase reactivators as needed.~~

I discovered the cure, being "autistic", without having received any of these treatments, but I just know it's the way.

And here I am. I am still spitting putrid taste everyday, with zombie dark circles under my eyes, without being able to walk correctly, and you guys already know the cure to a lot of chronic illnesses: **hemodialysis**.

Are you getting distracted with something? What's the hold up? I am needing this myself and we are not getting any of this if we don't react as a society.

Move it please, who doesn't know some family with an "autistic" member? Someone who would care about the information.

Just know, that hemodialysis is asked with a gun by the belt or something, but letting the doctor know that he can't deny.

Let the Matrix fall.

The common enemy have done this, the psychopaths.

To heal, but to not forget.

Because it antagonizes some acetylcholine receptors, not so much because of antiserotonergic or antihistaminic properties.

I mean, everything should be held in consideration.

Why would one "need a drug" in the first place? Or a supplement?

One may have come getting used to be poisoned little by little.

I have come understanding that through Russian roulettes of vaccinations and hidden poisons in everyday things, like some caffeine sources, one can get loaded with pesticides.

And among those pesticides one should be most wary of those lipophilic, and that be causing long-term reactions, like irreversible acetylcholinesterase inhibition, (e.g.: organophosphates).

So, if one comes used to having excess of acetylcholine, he may be irritable, close-minded, and vulnerable to overreacting to things. Isn't this pretty much our society?

Just check, put yourselves to fast. No one could have manic crisis just for fasting 24 hours or so.

Let's not push problems forward for later.

Cyproheptadine could block those acetylcholine receptors being overstimulated (some), and cause relief. Is that the solution?

No.

But there you go. Two cents and a little bit more.

And when people faint in blood donation is not "because of drop in blood sugar". That's a cover up. But the personnel has never been properly educated, so they just follow along.

Be careful, because people with blood poisoning are very vulnerable to "dying out of nothing". A minor cut, some blood lost, they faint, and die, out of the fall in the ground or because of the hemorrhage and low blood pressure. It's a neuroplasticity subject.

The body got used to have the poisons, so it designed a system of compensation. If the poisons are removed quickly, the body can't readapt. It's shock.

We are right on time, for many.

It's on you.

Do look into enterosorption techniques (activated charcoal, fiber, cellulose, clay, zeolites) I think they are better than your proposal of hemodialysis.

I don't know why you would *think* it would be better than hemodialysis.

The thing is people can access to all that folk medicine you mentioned. But access to hemodialysis is restricted, hidden, bureaucracy in between, having to deal with agents, scared doctors, and ultimately dealing with mafias.

It's the panacea. Don't say yes or no before trying. It's obvious.

But that doesn't replace the use of reactivators of the acetylcholinesterase. For cases when it be needed, it's both things.

Why do you call it folk medicine? It's being used in mainstream medicine. Hemodialysis also runs the risk of introducing chemicals to your body.

I wanted to write this post because much could be learnt from this.

Written by an Argentinian, that has lived all his life in that country. 27 years to date.

Us Argentinians have been deprived of education.

Have been brainwashed.

Have been pushed and normalized sexual immorality.

Normalized the eternal inflation, cursing our own country, despising our own currency, and conditioned to think always in turn to a foreign currency, the US Dollar.

This has always been a beta country, a bullied country for at least a hundred years. Paradise of the psychopaths. Hell of the people.

So, as it was fair, God saw that from this country should come the worldwide reckoning. Get ready, because it's coming to each of your countries.

The principles by the which it could happen in Argentina are the same that could be applied and have been applied in the rest of the world, as it was possible.

The psychopaths have created corrals. You know, there's a saying in Spanish: "*Dios los cría, y ellos se juntan*".

This would mean: "*God breeds them, they just gather*".

So, by nature, everyone ends up with the ones they belong with, that's how groups are created. Because they just gather.

So, people that think "they are better" in my country, they just leave. Because they have been cowards, or didn't know what to do.

And they go where? The corral for that people.

That would be the so-called first-world countries. But really, it would just remain Europe as the corral per-se.

There's another say in Spanish: "*El que mucho abarca, poco aprieta*".

- "*He who embraces much, squeezes little*".

That's why the common enemy will try to destroy everything far from the Mediterranean Basin, the territory of the Roman Empire.

So returning to the concept of "people join with the ones they belong with". There's a problem when this doesn't happen.

Why wouldn't it happen? Disability.

Just check, many people are living with the ones they are just stuck with because they can't get a job. But the thing is, that if they had the job, they simply couldn't work. They would quit or something. There's a lot of disability. These are the people that don't go out of their house much. The silent pandemic. Jerking off in misery, killing themselves with porn.

And the major cause of learned helplessness is **guilt**.

I come saying in my posts that we have been set up in a system of induction to error. To make one fall, to then be kicked in the floor. It's the bully grabbing the beta by his own hand and smacking him in the face, while saying "don't hit yourself".

We are getting out of this together.

And just know. The corral thing is all about making the people in the "first-world countries" think that everything is alright because "everything kinda looks in order".

But we all live in this world. And just as I got poisoned because of living around a lot of people letting themselves die in my country, so because of the decay of Argentina, the rest of the nations could pay. We are not to look the other way.

Because they have taken advantage of a country filled with learned helplessness to poison with ~~organophosphates~~ organochlorines and metals the people, to then say that "there is a virus".

Speculating with the ignorance of the people, pretty much worldwide, to make them run to get more poisons with the injections.

Because the enemy speaks in mafia language, called the "virus" the people. And those that have planned it, wanting to see the zombie apocalypse with popcorns.

But God is turning the tide.

For without cause have they hid for me their net in a pit, which without cause they have digged for my soul.

Let destruction come upon him at unawares; and let his net that he hath hid catch himself: into that very destruction let him fall.

And my soul shall be joyful in the Lord: it shall rejoice in his salvation.

Psalm 35: 7-9.

And Argentina has turned into a massive in-plain-daylight MK-Ultra. With the not-so affected living like "nothing happens". "They are still banging".

~~People with chronic, low dose and not-so low dose organophosphate poisoning have chronic excess of acetylcholine in their brains and body.*~~

People with chronic, low dose and not-so low dose **organochlorine** poisoning have altered their sodium channels in the cells. **I had to edit this part.*

So they become vulnerable to overreacting and being irritable. While they are made the psychological warfare everyday with the mainstream media. They have either porn things, or "news", between comas, that is all speaking about problems.

So people may end up imploding. Never hitting the common enemy, that majority of people wouldn't even know which it is, because of mental conditioning. And they end up killing themselves in between their households.

So we have to react as a society worldwide, because if Argentina suffers this, the rest of the world soon gets affected. Which was the plan.

So again I say it, we are about to put an end to a genocide in diapers.

Now I have made the explanation a little bit more thorough, but what now I do, is make a clear call to action.

Help yourselves, and help Argentina.

Pass the message please.

Your honest opinion / thoughts on Javier Milei please.

No one can say that the way to end inflation be to throw away the national currency changing it for the one of other country.

It's still psychological warfare. To then make the people feel humiliated to the extreme.

It's all a war for the time of the people, worldwide. Time passing, nothing changing? It's a win for the psychopaths, that are speculating with the poisoning of the people in their PUFA fat.

I came telling you, the Matrix goes down this 2024. Let's speed it up, please.

Besides, the so-called first-world countries could handle better their winter than we would some months from here.

In any ways, the sooner the better for all of us.

Remember, not even the cryptos are going to be good for anything. Stock goods, and don't forget to share with those needed. War be good against evil.

And don't found your lives over the sand again, please.

Thank you.

The world is about to get filled with rockstars.

Learn to cross yourselves, if you didn't know, and let Blue Monday sound worldwide.

Let any Eminence Front fall, has always been a put-on.

People forget, forget they're hiding.

Come and join the party...

Yes.

As it had to be, The WHO, with capital letters, going down.

And the New Order, quite a backfire for them.

Turn undisturbed.

Be thankful to the raypeatforum.

I have never seen a forum like this. With a decent number of visits, and a good moderation. [@charlie](#).

Everything in Reddit is biased. Anyone wanting to post something against the current, precisely the truth, he will get banned. His account will be made a ghost account, and in the meantime agents will try to influence the opinion of the people with their comments and downvotes.

Let's snap out of it, it's time to get serious.

As I say, the Holy Ex will bring a better world. There's no other.

I discovered the cure of "autism", nothing. People are jerking off, seeing who are they going to be sleeping with...

Then don't get angry because of shootings in your face. Autistic people are demanding solutions. It has always been a poisoning.

Acetylcholinesterase reactivators don't be lacking, hemodialysis for the people, that it be no longer hidden.

And remember, all of being a man, a semen retention rockstar, is to be a good soldier. It's not for banging the daughters of the neighbor, sullyng them.

Fornicators, people not **aiming** towards decency, are going to be relocated in the core of the Earth. And I will feel proud of it myself.

Anyone escaping from the hands of the procers, will not escape from the hands of God.

That's my message.

From Argentina.

You know which day I was born? The 30 of April of 1996.

This is the same date known to be of Hitler's death. But his was in 1945.

This means, that when he died, then I was born.

To bring the Third World War, that of good against evil, like it has never been in the history of the world wars.

My mother is a pharmacist, and my father is a doctor.

My family business is called "La Compañía", which means "The Company".

This means that God is showing who is truly His company, the TRUE Company of Jesus.

What an honor.

God is showing everyone that this comes from Him.

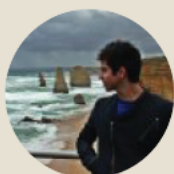

And even, I understand He is showing who is the true lion.

Let's get angry.

This is the fulfillment of the prophecy written in the book of Revelation, chapter 3.

The Lord knocks the door of the Church of Laodicea

And unto the angel of the church of the Laodiceans write; These things saith the Amen, the faithful and true witness, the beginning of the creation of God;

I know thy works, that thou art neither cold nor hot: I would thou wert cold or hot.

So then because thou art lukewarm, and neither cold nor hot, I will spue thee out of my mouth.

Because thou sayest, I am rich, and increased with goods, and have need of nothing; and knowest not that thou art wretched, and miserable, and poor, and blind, and naked:

I counsel thee to buy of me gold tried in the fire, that thou mayest be rich; and white raiment, that thou mayest be clothed, and that the shame of thy nakedness do not appear; and anoint thine eyes with eyesalve, that thou mayest see.

As many as I love, I rebuke and chasten: be zealous therefore, and repent.

Behold, I stand at the door, and knock: if any man hear my voice, and open the door, I will come in to him, and will

sup with him, and he with me.

To him that overcometh will I grant to sit with me in my throne, even as I also overcame, and am set down with my Father in his throne.

Revelation 3:14-21

Related to the "hour of temptation", in which them that dwell upon the Earth will be tried (Revelation 3:10).

If the Lord says He does it, and still hasn't returned, it means He will make it evident it is Him.

There are lots of Easter eggs.

I live in Caleta Olivia, Santa Cruz Province, which means: The Province of the Holy Cross.

In which all the world will gather again.

Because some few years ago, a lot of people from different countries came to this region because of the implosion of the submarine ARA San Juan.

Now what is imploding is the world.

And, besides, this city is known for its statue of a symbol of the now about to be known as "The Old World", or "The Past".

The industry of fossil fuels.

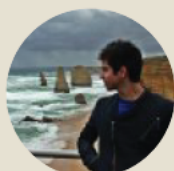

This is what the Lord is about to crush now.

I want it to be all a party.

Get dressed like in the eighties, the hairstyle may be made in the move, it's going to get bumpy.

Dress yourselves like Mennonites, like anything you please, just avoid the cassocks, they are going to be dangerous.

Military outfits and those of the armed forces be just that, outfits. We are what we do.

And above all, remember this is serious. We want solutions.

The most difficult has already been put at hand. Now it's time to make our move.

Europe is going to turn into North Korea.

Feel free to come to my country, and let's show off how we can turn it into a first-world country in no time.

Let your flag be that of the sky.

Because nationality means sense of belonging, not where one was born in.

Come and let's make America great again, since America is a continent,

Let's make it great from its beginning, to its end.

From Alaska, to our Malvinas.

Because it's part of the deal.

I want my flag waving there.

That so it be.

I know this is a health forum. But exactly that is what has been put at hand to all of us. To not be supplement freaks or to not know with what one is stumbling, but to have clear sight.

The world is about to change drastically. Some will wake up, others won't.

The world is about to wake up to all the decades of work not done. Of having looked the other way, and a lot of people that have suffered for that. Lots of people have committed suicide because of having been abandoned. Others have developed addictions, and others are contemplating suicide everyday.

And what is coming may look shocking to anyone. But we must make hope breach through this, because there is.

The world is about to see the destruction of one of the biggest works of the Devil: the Matrix.

The Matrix has been installed after the French Revolution. Little by little, as people thought that it was something to celebrate. That's how we have been slow-cooked as a society. People eventually minding their own bubble and living like islands, in an all-connected world.

We have just been saved from a worldwide genocide, lots of people still don't know. But the same lack of work done, and all the social engineering of the common enemy has left us in a very uncomfortable situation. This means the world, specially the western world has been plagued with psychopaths, with bad weeds. With people that have got corrupted and have no way back. Just some will be able to get corrected. But we will find ourselves having to be quick with the back to normal.

Standards must be set, all those pertaining to common sense, but reality will show a lot of people the truth of the words I have just written.

What I am asking is, please, pass the message. I don't speak "conspiracy theories". I speak solutions. I speak hope, and education.

To bring back normal, to bring truth, God is bringing the **Argentinian Revolution of 2024**. This is what is about to happen.

And it will be replicated in all the world.

That it be done, and well done.

We need worldwide cooperation.

Asking again, share the files: the free E-book Modern Procer Project NOW!, and the series of four articles made an E-book too. These are the guidelines of the Project.

The website is **modernprocer.com**.

And please, help with translations. When the thing be on us, we will appreciate we received help because we did things with a brain. ([GitHub link](#))

Thank you so much.

I want to make it very clear.

We need soldiers, and we need health for that.

The mindwork has already been put at hand, that was the most difficult and it is all a gift of God.

We need to set people free from their cages of mental conditioning.

Lots of chronic illnesses are just symptoms of poisoning.

And we need to free hemodialysis for that. How are we going to do it? Do you think Big Pharma will be happy about it? Or the WHO?

All the guidelines have been marked in the writings. Time to act. Remember every person around us affects us. The same every country of the world, affects the neighboring.

The cure of "autism", besides using hemodialysis properly, is ~~administering the acetylcholinesterase reactivators*~~. We need to pass the message. Are we going to trust in labeled vials? All this terrorism has been done in purpose. We need to produce and secure these medicines ourselves. *edit: is mainly hemodialysis alone. Just cleaning the blood, simple as that.

Let the obvious be told, the dose makes the poison, or the medicine, and the way of administration.

Please, move it.

I plan on making this my last post for now.

Please, print everything.

Imagine there will be power shortages in all the world, but don't worry, God is sending **His**.

Barabbas be damned. It's Jesus who has saved the world again. The real Jesus, not the imposters. The one that has done it through His spirit. And that is to return soon.

Remember to have print Bibles too. The recommended version in English is the King James Version.

Regarding food and resources, remember there is enough for everyone if the bad weeds are plucked away. Do this among the priorities.

The common enemy are the psychopaths, worldwide.

And don't forget about my personal petition:

The Pope, the today Argentinian Anti-Christ be flying away from his balcony into Saint Peter's Square, and be made a mashed potato.

That's what he deserves.

That so it be.

modernprocer.com

A random guy from the Internet found the cure of autism? Yes. It makes sense.

Guille Yacante · Mar 3, 2024 · [autism](#) [cure](#)

I already said I am thinking on not posting anymore for now, but as I came speaking about this, that I found the cure, I wanted to leave all the details in order.

I came like with "organophosphate blinkers", speaking that they are the cause of "true autism", but it could be caused by organochlorines as well, and maybe more likely. Since they usually have a longer half-life, even up to years.

DDT would be an example.

Organophosphates and organochlorines have something in common: they disrupt the sodium channels of the cells. This would be the main cause of "autism", since autism is a symptom of poisoning.

What does the word mean? To be isolated one within himself.

It's obvious. It's mafia language.

Let's wake up quickly and safely, please. As a society.

The cure will always be mainly **hemodialysis**.

If these poisons, organochlorines, are feared because of their long half-lives, everything is solved just cleaning the blood. The always ignored subject. Because it's the way to heal a lot of "chronic illnesses".

Move it, insist.

Common sense is at the door. Don't be afraid, feel proud.

All these things, all these pushing of problems have been made to **kill all the world**.

The Devil has come fooling some, tricking them to look the other way because they "would get rich", "have the ladies", and look "like the real deal" in the decadence of the rest.

But it's all self-destruction. We all lose because of these people, the perverse. They may be blind, may be repenting then, but there are some they just want to kill the people because of plain hate. These are the psychopaths.

For example, in my country Argentina, there is a genocide in plain daylight. And anyone looking the other way would pay immediately. Because it's the same as if it was done to your neighbor next door. We all live in the same world.

And the plan was to start it in South America, to then spread it to all the world, with the mental conditioning that it was a "virus".

So as I am in some way saving you, please, pass the message, and let's help each other, because I am still needing this treatment, and we are getting this only if we demand it.

I wanted to expand on this some more.

If a poisoned person was to receive hemodialysis, after she had detoxed she would very probably say: "I didn't feel like this since I was a child."

Because these poisons rob us of our ability to sense the smells, the perfumes, to have emotions, to cry and laugh.

And among the best, people will be able to get angry. Angry, and proud. This is what I want to bring it to.

And these people will understand of all of what we have been robbed, and all the lives that have suffered because of the secrecy, and even the people that are no more because of this.

The Third World War really started after the Second ended. But now we are about to defend. We will shape the Third World War and feel proud about it.

Finishing the topic, these poisons, the sodium channel disruptors seem to make it difficult for the cell to get rid of its waste products normally, so when it finally has the chance to do it, it seems that it throws the waste all of a sudden, causing the poisoning of the blood, and a putrid taste in the mouth. We are to never normalize this.

I share below a video that explains "pesticides" pretty well.

[YouTube: Insecticide classes & modes of action.](#)
